Subject: Eco-toxicologist and Charleston Chemical Spill

Frank,

Got your message of yesterday (best to use my cell phone as I am not in the office most days).

Kathy Patnode with the USFWS in State College was interested in obtaining fish and related toxicological data on MCHM as there were some mussel beds near the facility. The Eastman Company human health toxicologist gave me the name of the Eastman eco-toxicologist and I passed his name and contact info on to Kathy. I assume she obtained the eco tox study documents as she told me she set up a call with him.

I did let Bruce Pluta, eco scientist in EPA R3 HSCD, know about this call.....but I don't think he got much involved.

That was it for me regarding eco tox issues..... I just served as a go between.

Jack
